PROFESSIONAL SUMMARY

Final-year Artificial Intelligence student and Backend-Focused Full-Stack Developer with strong experience in Laravel backend and React frontend development. Designed scalable RESTful APIs with JWT authentication (including refresh token flow) and role-based access control (RBAC). Built interactive dashboards and designed deep learning ensemble architectures for financial time-series prediction. Competitive programming background (ICPC participant) with strong analytical and problem-solving skills. Seeking a junior backend or software engineering role to contribute to scalable system design and real-world AI applications.

TECHNICAL SKILLS

- Programming: PHP, JavaScript, Python, C++, Java, C#
- Frontend: React.js, Next.js, HTML, CSS, Tailwind CSS, Zustand, Redux
- Backend: Laravel, NestJS, Django, RESTful APIs, JWT Auth, RBAC, MVC Architecture
- Database: MySQL (Schema Design, Optimization), PostgreSQL, Supabase, Neon, Redis
- Cloud & Services: Firebase, Vercel, Railway, Laravel Cloud
- DevOps: Docker, CI/CD, Linux
- AI & Data: Neural Networks, Deep Learning, Machine Learning, NumPy, PyTorch
- Tools: Git, GitHub, GitLab, Bitbucket, Postman, Insomnia, Apidog, Jira, Clockify, Clickup, Termius
- Concepts: OOP, Clean Code, Algorithms, Problem Solving, ICPC
- AI-Assisted Development: Claude Code, GitHub Copilot, Codex, Google Antigravity

EXPERIENCE

Backend Developer - Freelance/Contract | Trip Ride-Sharing Platform (Laravel 10) | 2025

- Designed and implemented a scalable RESTful API supporting users, drivers, trips, and vehicle management.
- Built secure authentication system using JWT and Laravel Sanctum with OTP verification via SMS integration.
- Integrated Supabase (PostgreSQL) for real-time driver location tracking and geospatial data handling.
- Implemented Firebase push notifications using krait/laravel-firebase.
- Designed modular architecture using Services, Repositories, and API Resources.
- Implemented optional Redis-based caching and queue handling for performance optimization.
- Source code available upon request (private client project).

PROJECTS

Mobile Applications Backend (Laravel) | 2024-2025

- Designed and implemented 150+ RESTful API endpoints for e-commerce and inventory mobile apps.
- Integrated JWT authentication with refresh token flow and role-based access control (RBAC).
- Optimized MySQL database schema and queries for performance and scalability.
- Deployed and integrated backend services with Supabase, ensuring secure environment configuration.

GitHub: [Link](#)

School Management System - Frontend (React) | 2024

- Built 20+ reusable and modular React components for a responsive admin dashboard.
- Implemented state management, protected routes with JWT authentication, and dynamic role-based UI rendering.
- Designed structured layouts with interactive tables for attendance, grades, and scheduling.

GitLab: [Link](#)

Stock Price Trend Prediction - Deep Learning Ensemble (PyTorch) | 2026

- Designed an advanced deep learning ensemble for 30-day stock price movement prediction (Rise/Fall).
- Built three complementary architectures: TCN, Transformer Encoder, and Attention-based BiLSTM.
- Engineered 60+ technical indicators (SMA, EMA, RSI, MACD, ATR, Bollinger Bands, VWAP) with feature selection via correlation filtering and mutual information.
- Implemented Focal Loss, Label Smoothing, LR Warmup, gradient clipping, and walk-forward validation.
- Achieved 58-62% accuracy and 0.60-0.66 AUC-ROC on imbalanced financial time-series data.

EDUCATION

B.Sc. Artificial Intelligence Engineering | Damascus University, Damascus, Syria | 2022 - Present

TECHNICAL & VOLUNTEER EXPERIENCE

- Technical Team Volunteer - Faculty of IT Engineering (2024-2025): Contributed to technical initiatives and student support activities.
- Student Union Volunteer - Faculty of IT Engineering (2025-Present): Participated in student technical and organizational activities.
- MAPS Organization - Volunteer & Trainee: Participated in workshops and technology-related initiatives.

CERTIFICATES & LANGUAGES

- ICPC Competitive Programming Participant
- Languages: Arabic (Native) | English (Intermediate - B1/B2)
